Ahmed Mubarak Qurany Mubarak

.NET Backend Developer

ahmedmopark68@gmail.com | +20 101 557 7363 | Egypt , Beni Suef | LinkedIn | GitHub

Professional Summary

Results-driven .NET Backend Developer specializing in building scalable and secure RESTful APIs using ASP.NET Core. Strong expertise in Clean Architecture, microservices, and Entity Framework Core with solid experience in SQL Server. Experienced in authentication and authorization (JWT), payment integration, and event-driven systems . Committed to writing clean, maintainable, and high-performance code with a focus on reliability and best engineering practices.

Technical Skills

Backend Development: C#, ASP.NET Core, ASP.NET MVC, RESTful APIs

Architecture & Patterns: Clean Architecture, Repository Pattern

Database: SQL Server, Stored Procedures, Indexing, Transactions, Query Optimization, EF Core, LINQ

Performance: Caching, Pagination, Rate Limiting, Health Checks, Response Compression, Global Exception Handling

Security & Testing: JWT Authentication, ASP.NET Identity, AutoMapper, Rate Limit ,Unit Testing, Integration Testing

Frontend: HTML5, CSS3, Bootstrap 5, JavaScript

Tools: Git, GitHub, Postman, Swagger, Visual Studio

Projects

E-Commerce Platform API *Backend Developer*

ASP.NET Core 9, SQL Server, Clean Architecture , LINQ, EF Core, JWT, GitHub Actions

- Designed and implemented a **production-ready E-Commerce RESTful API** using **ASP.NET Core Web API** following **Clean Architecture principles**.
- Implemented **Generic Repository and Unit of Work patterns** to manage database transactions and abstract data access.
- Implemented **secure authentication and authorization** using **JWT and ASP.NET Core Identity**.
- Integrated **Stripe payment gateway** to manage the **PaymentIntent lifecycle** and handle payment edge cases.
- Used **AutoMapper with custom value resolvers** for dynamic mapping such as environment-based image URLs.

Aqarak – Real Estate Web Application *Fullstack Developer*

ASP.NET Core MVC, EF Core, SQL Server, ASP.NET Identity, Javascript, Bootstrap, jQuery, Ajax

- Developed a **real estate web application** using **ASP.NET Core MVC** for property listing and management.
- Implemented **user authentication** and a **favorites system using AJAX** for a dynamic user experience.
- Built **advanced filtering** for properties by **price, category, and governorate**.
- Integrated **image upload functionality** for property listings.
- Designed a **responsive user interface** using **Bootstrap, HTML, CSS, and JavaScript**.

Aqarak – Real Estate Web API *Backend Developer*

ASP.NET Core 9, SQL Server, Repository Pattern , LINQ, EF Core, JWT, GitHub Actions

- Developed a scalable **Real Estate RESTful API** using **ASP.NET Core Web API** following **Repository Pattern**.
- Implemented **user authentication and registration** with secure API endpoints.
- Built **CRUD operations for property management** with image upload and storage.
- Designed **Favorites management system** allowing users to save preferred properties.
- Structured data exchange using **DTOs** and handled database operations with **Entity Framework Core and SQL Server**.

Education

Beni Suef University *Beni Suef,Egypt*

Bachelor of Computer Science and Information Technology *Sep 2023 - May 2027 (Expected)*

Languages

Arabic: Native | **English:** Professional Working Proficiency
